CCleaner does do these things and more It takes the Disk Cleanup concept and runs with it, extending it to more data in Windows and third-party programs that the Windows Disk Cleanup tool won't touch If you have an old PC that you've never run CCleaner or even Disk Cleanup on, you should give it a go.. For example, when opened, scam web pages display fake virus alerts They run fake virus scans and trick people into believing that the operating system/computer is infected with a virus and that it can be removed with a certain program (such as Advanced Mac Cleaner, Mac Cleanup Pro, and so on).
