Enjoy. SimLab FBX Exporter for SketchUp download link (System requirements): The plugin is available for Windows platform only. The use of non-traditional dental materials and devices to treat patients is rapidly increasing. With this increase in clinical usage, there is also a need to further our knowledge of the biocompatibility of these materials, devices, and procedures. This proposal describes a 5-year career development plan for the principal investigator, Dr. Benjamin Smith, a general dentist, to develop expertise in the conduct of preclinical and clinical investigations. Building upon his background in research on oral mucosal grafts, Dr. Smith will be mentored by a Dental Research Career Development Award-P30 (RO1) team that has extensive experience with designing, conducting, analyzing, and reporting data for human subjects and preclinical animal studies. The proposal aims to study the safety and efficacy of a novel, resin-free, orthodontic bonding system with adhesion promoting properties. Specifically, the research plan intends to establish in the animal model, evidence for the effectiveness of this novel adhesive in
